PROFESSIONAL PROFILE

Senior Ruby on Rails contract engineer with 7+ years of production experience across healthtech, e-commerce and marketplace platforms. I provide hands-on engineering services through Mercantiworld, working with established teams on Rails applications and full-stack delivery. Experienced with PostgreSQL, React, Hotwire, AWS and background jobs, from technical design through testing and deployment. My earlier commercial career informs practical product decisions.

TECHNICAL SKILLS

- Ruby on Rails
- PostgreSQL
- React.js
- Hotwire
- Stimulus.js
- Turbo
- AWS / Heroku
- Redis / Sidekiq
- Solid Queue
- Solid Cache
- Docker
- CI/CD

CAREER SUMMARY

SENIOR RUBY ON RAILS CONTRACT ENGINEER AND FOUNDER - MERCANTIWORLD July 2025 - Present

- Mercantiworld is my company for independent Rails engineering engagements and development of bespoke e-commerce technology. Since June 2026, client contract work has been my main focus.
- Contribute to existing Rails and full-stack applications within client teams, working across backend features, frontend interfaces, tests and deployment.
- Designed and built a Rails 8 and Hotwire e-commerce platform, integrating Stripe and Braintree payments and AWS infrastructure including Elastic Beanstalk and S3.
- Own technical decisions and delivery across application architecture, PostgreSQL, background processing and production readiness.

PRODUCT ENGINEER - SCAN.COM (US ENGINEERING TEAM) November 2022 - July 2025

- Core contributor to the rebuild of the US B2B scheduling platform, with role-specific portals for attorneys, referring providers and administrators and complex access permissions.
- Delivered a patient results portal that let imaging centres share scan results through provider-generated access links, owning Rails backend and React/Hotwire frontend work.
- Built for an estimated 5,000 users in the initial Georgia rollout, with an architecture intended to support national expansion.
- Collaborated on a Traumatic Brain Injury assessment tool, with attention to sensitive clinical data and user experience.

FULL STACK RUBY ON RAILS DEVELOPER - BOILERJUICE July 2021 - November 2022

- Built an iPad-friendly field data capture tool for heating oil tank inspections, recording customer and tank details and dip measurements.
- Owned Rails, PostgreSQL and responsive frontend delivery for engineers working on site.
- Extended AWS DynamoDB integration to sync submissions in real time and give customer service teams current field data.

RUBY ON RAILS DEVELOPER - KING AND MCGAW February 2021 - July 2021

- Improved e-commerce product pages, search, filtering and checkout using Rails, Vue.js and Tailwind CSS.
- Expanded RSpec coverage from 40% to 85%, improving confidence in releases.

BUSINESS SYSTEMS DEVELOPER - HOSTELLING INTERNATIONAL June 2019 - November 2020

- Improved the frontend experience on hihostels.com using Ruby, HTML, CSS and JavaScript.
- Worked with a Padrino-based Ruby backend before moving into Rails development.

EARLIER CAREER

PHARMACEUTICAL SALES 2004 - 2019

- At GSK Vaccines, managed the Travel Vaccine portfolio across South London for 12 years, growing revenue 4-5% annually in a declining market.
- Held subsequent roles at Aymes Nutrition and earlier positions in medical sales before transitioning to software engineering.

EDUCATION

Diploma in Sales Management - Damelin College, South Africa
Secondary School - Damelin College, South Africa
